

Test Fixtures & Safety Enclosures

CORTEKTESTSOLUTIONS.COM

- Strategic partner
- Innovative solutions
- Custom & Off-The-Shelf products
- Cost-effective & competitive rates
- Superior quality
- Best-in-class service
- Candor in communication
- Made in the USA

Technology at work for you!

Cortek Test Solutions is a pioneer in applying the reusability and modularity concept to designing test fixtures for electronics products. CTS products have an advantage because they are genuinely modular, adaptable, and scalable in size to accommodate the customer's application when standard sizes don't meet the requirement. This makes the job of both design and test engineers easier. Cortek's solutions are cost-effective because the units can be re-tooled and reused. This sets us apart from the competition.

Custom solutions for your testing needs

Cortek Test Solutions has proven to be a reliable partner for many OEMs and ATE Integrators. CTS has gained recognition as a market innovator in designing, developing, and manufacturing custom and off-the-shelf test fixtures and safety enclosures.

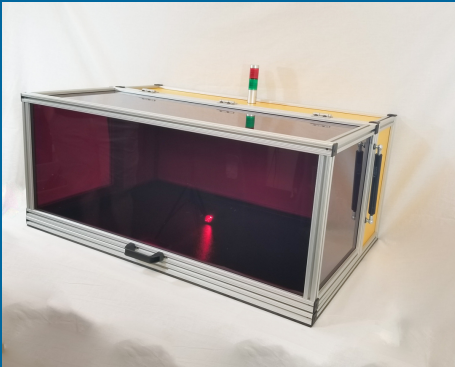

Cortek's design capabilities range from very basic to highly sophisticated solutions. Developing custom test fixtures demand more engineering time and in-depth knowledge of mechanical design and PCB test methods paired with precision machining. Our experienced engineers will evaluate your requirement and design innovative mechanical test fixtures to meet your application needs.

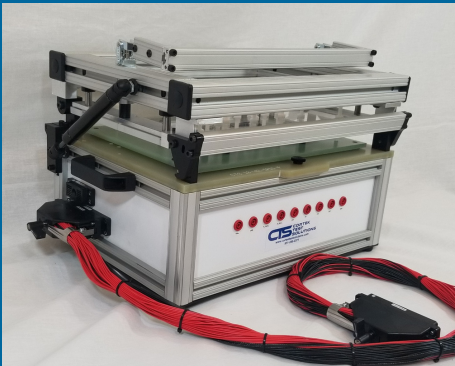

Solutions & Services

- Custom test fixtures
- Off-the-shelf test fixture kits
- HiPot Safety Enclosures
- Fixture probes and hardware
- Top, bottom, and side access probing
- Mechanical engineering services
- Design for testability analysis
- Machining services
- Drilling and routing
- Assembly and wiring
- Built to print

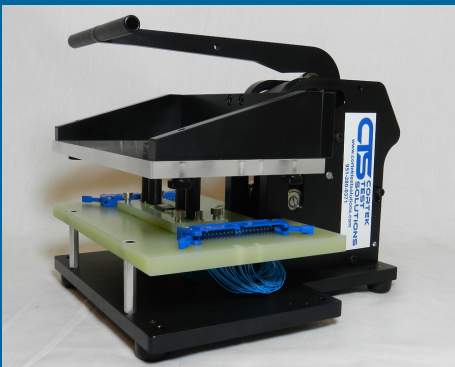

Our custom off-the-shelf products, along with custom functional fixtures, are designed for rugged usage in both R&D and production environments.

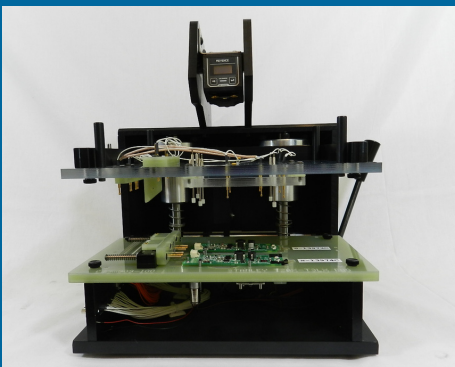

Custom size safety enclosure with red UV panels.

Z-Axis Mechanical Test Kit with custom programming and functional test fixture.

Flip top Mechanical Press for testing fine pitch contacts PCB.

Mechanical Press with custom fixture for high volume production of automotive PCBAs.
