# FAQ'S

@SOCALBLADEDBEAUTY

# What is Microblading?

Microblading is a form of semi-permanent cosmetic tattoo meant to mimic the appearance of natural eyebrow hair. Perfect for those who want to fill in sparse eyebrows and would like a more natural look.

@SOCALBLADEDBEAUTY

# What are Combo Brows?

Combo brows are microblading plus shading. This gives a denser more defined brow that makes it look like you might be wearing a tiny bit of makeup.

@SOCALBLADEDBEAUTY

# How long do they last?

Healed microbladed eyebrows can last anywhere between 1 to 3 years depending on sun exposure, lifestyle and skintype. Microblading fades over time so a touchup is recommended every 12 to 18 months.

@SOCALBLADEDBEAUTY

# Does microblading hurt?

Microblading is not meant to be painful but it depends on the pain tolerance of the person. Numbing cream is applied before the session to minimize any discomfort.

# TIPS & INFO

..... IMMEDIATELY AFTER INITIAL SESSION .....
